

Best Practice 4

Multipurpose and optimum utilization of infrastructure

1. Introduction:

Parallel expansion of infrastructure with academic growth is inevitable. However In case of affiliated government college raising financial resources for this ,have inherent limitations. To cope with this challenge the college had adopted this innovative practice.

2. Objective:

- (1). To provide best possible learners support
- (2). To utilize the idle time of resources
- (3).To ensure sharing of resources among academic departments and stakeholders
- (4). To ensure multiple use of resources

3.The Context:

In view of the shortage of smart classrooms , LCD equipments are installed in each floor ensuring common access to the classes of both arts and science streams. Room with EDUSAT facility Made common access. In view of the Lack of multipurpose hall(MPH) in the college, One big classroom is designed and furnished with LCD projector, TV , power inverter and low cost furniture and made common conference hall to conduct various events seminars, cultural functions etc. Well equipped EDUSAT room provide common facility for online programmes and webinars. These facilities are used by NSS , career counseling, sports functions, offline presentations and demonstrations.

Moreover, in view of the lack of other playground in the city, the college offered its large playground for the programmes of other schools and colleges, government departments and defence forces. It is also being used as Hallipad, educational fairs and exhibitions with advance permissions of authorities.

4. Resources:

The proposal of construction MPH and PG BLOCK is under consideration. Till then the existing facility is utilized with any extra cost.

5. Evidence of success:

The number of classes using ICT has increased and number of extra curricular events were dramatically increased with enhanced participation. The social sensitive cooperative image of college has also grown.
