

Organic chemistry is a vibrant and growing scientific discipline that touches a vast number of scientific areas. The study of organic chemistry is much like learning a language where the reactions are the vocabulary and their mechanisms the grammar. The purpose of the present book is to incorporate advances in the area of mechanisms of named reactions. The present book deals mainly with the mechanisms of 200 important named reactions. In preparing this book, I have taken great care to treat each reaction with clarity and consulted the latest syllabi laid down by almost all Indian universities. The latest journals and periodicals have been consulted for its compilation.

Named Reactions

Pramod Kothari

Pramod Kothari

Dr. Pramod Kothari is working as an Assistant professor, in Deptt. of Chemistry, Government Post Graduate College Beninag, Pithoragarh, U.K., India. He has obtained his M.Sc. and Ph.D. from Kumaon University, Nainital (Uttarakhand), India. His specialization is Organic Chemistry.

Named Reactions

A Collection of 200 Reactions with detailed mechanism

Glass is the most important substrate material suitable for fabrication of passive and active integrated optical components. The refractive index of a glass substrate is very close to that of the optical fibers (in 1.40), which minimizes the coupling losses between glass waveguides and optical fibers. Glass has excellent transparency in the visible and near infrared spectral regions and can easily be made in different sizes and shapes with very high homogeneity. As an amorphous material distinct from crystals, it is easier to produce polarization insensitive integrated optical components in glass. In addition, Glass has a high threshold for optical damage; it is mechanically very rigid and relatively inexpensive. Glass is also suitable host for rare earth ions. This has allowed for the fabrication of optical amplifiers and lasers.

Framod Kuthan

Dr. Framod Kuthan is working as an Assistant professor, in Department of Chemistry, Government Post Graduate College, Binnag, Pithoragarh, Uttarakhand, India. He has obtained his M.Sc. and Ph.D. from Kumaon University, Nainital. His specialization is Organic Chemistry.
